Frederick S. Pardee

School of Global Studies

The Causal Impact of Family Planning on Health and Well Being in Urban Malawi: Some Experimental Findings

Dr. Karra is the Associate Director of the Human Capital Initiative at the Global Development Policy Center. His research utilizes experimental and non-experimental methods to investigate the relationships between population, health, and economic development in low- and middle-income countries. His current research uses randomized controlled trials to evaluate the health and economic effects of improving access to family planning and maternal and child health services in Malawi, India, Nepal, Sri Lanka and Tanzania.
