

Demography Seminar

Tuesday, March 7th

12:15pm-1:30pm

8417 Sewell Building

Cameron Campbell

University of
Hong Kong

Division of Social Science

The Family in Contemporary China: Lessons from the Past

Cameron Campbell is Chair Professor of Social Science at the Hong Kong University of Science and Technology and for 2022-23 is a Fellow of the Stanford University Center for Advanced Study in the Behavioral Sciences. His research focuses on demography, stratification and inequality in historical China and in comparative perspective using large, multi-generational population databases, notably the China Multigenerational Panel Datasets. He investigates topics including economic, family and social influences on demographic outcomes such as birth, marriage, migration, and death, fertility limitation in historical China, and the role of kin networks in shaping social mobility.
