

Demography Seminar

Tuesday, January 31st

12:15pm-1:30pm

8417 Sewell Building

Paul Delamater

University of North
Carolina-Chapel Hill
Department of Geography

Understanding the Relationship Between Herd Immunity and Geographic Scale

Dr. Delamater is a Fellow at the Carolina Population Center at the Sheps Center for Health Services Research. He is interested in the geographic aspects of health outcomes and behaviors, as well as health care access and utilization. He uses methods that employ geographic information systems (GIS) and spatial analysis to better understand population health issues. His recent research has focused on understanding childhood vaccination, herd immunity, and vaccine-preventable diseases in the US.
